

Post-doctoral Position in the Henkel-ICIQ Joint Unit

Excellence is our Passion

A post-doctoral position is available at the **Institute of Chemical Research of Catalonia (ICIQ)** in the **Henkel – ICIQ Joint Unit**. You will work in a highly dynamic and international team on an industrial relevant research project for the development of high performance adhesives.

Henkel, the world market leader in adhesives, sealants and surface technologies, is known for innovative chemistry and materials as the backbone of its product lines. Henkel products address many important markets, such as the automotive and electronics industries as well as craftsmen and consumers.

Requirements for the candidate:

- Ph.D. degree in chemistry, especially polymer chemistry.
- Well in different polymerization technologies and corresponding characterizations.
- Preferred the good background with miniemulsion polymerization.

Good English communication skills are essential. An open minded, self-motivated and result driven personality is important.

We Offer:

- One year contract
- Entry date on September of 2012.

Please submit your CV, a cover letter with a description of previous accomplishments and at least one recommendation letter from your supervisor, to: LLSOLA@ICIQ.ES indicating the position reference (**ref:HJU**) Your application will be treated confidentially.

Location: The Institute of Chemical Research of Catalonia is located in the Mediterranean city of Tarragona, 80 km south from Barcelona, in Spain.
